

EU-REACH-SVHC (Substances of very high concern)

Ref.: Regulation EC 1907/2006

A new list of SVHC substances has been published by ECHA on **17th of January 2023**

(233 substances).

SVHCs as defined at: <https://echa.europa.eu/candidate-list-table>

We do not analyze SAX Polymers products (SAXAMID, SAXALEN, SAXAFORM, SAXADUR, SAXALAC, SAXASAN, SAXATEC, SAXALON, SAXALOY, SAXACOND, SAXAKETON) for the presence of SHVC substances/groups of substances. To the best of our knowledge, we do not intentionally add any SVHC substances as ingredients in our formulations.

Based on the information collected from our ingredient's suppliers, SAX products mentioned above - each in colors natural/N001 and black/SWS005 - do not contain any SVHC substances above the declaration threshold.

We also confirm that future extensions of the candidate list published by ECHA will be compared with our formulations. We will inform you immediately as soon as it comes to our knowledge that one of the newly included substances is present in our products.

We have to indicate that SAX Polymers Industrie Ges.m.b.H. as a compounder does not have any influence on the products made out of these compounds or on their processing conditions. The testing of finished products concerning relevant directives are in the responsibility of the manufacturer. This confirmation is based on the assumption that no chemical media influence is present.
